

growth mindset ways to help your child

TALK ABOUT IT

Talk with your child about his or her day, but guide the discussion by asking questions like:

- Did you make a mistake today? What did you learn?
- What did you do that was difficult today?

ENCOURAGE FAILURE (say what?!)

Your child needs to know that failure can (and often does) happen and **it is okay!** Remind her that each time she fails and tries again, her brain is growing stronger! Don't step in to prevent your child's failure - this is how she learns to persevere in the face of challenges.

PRAISE THE PROCESS

Instead of saying, "You're so smart!" praise effort, goal setting, persisting through challenges, or being creative.

You can say something like:

- "Wow! You must have worked really hard on this!"

THE BRAIN CAN GROW!

Remind your child that **his or her intelligence is not fixed**. Remind her that when things are difficult, her brain grows if she persists through the challenge. Each time she learns something new, her brain is making new connections. Your child needs to know this is possible!

HELP THEM CHANGE THEIR DIALOGUE

The way your child talks to himself makes a huge impact on his mindset. If he says, "This is too hard!" help him change that to "I can't do this yet, but I will keep trying." Give him the words to say when he is feeling defeated by modeling it yourself!
